WEB DEVELOPER

I am a front-end developer with a curiosity for data science! I specialize in creating immersive web experiences that captivate users from the first click. Whether it's crafting responsive designs and love blending creativity with analytical insights.

SKILLS

HTML CSS JS Bootstrap jQuery	React.js	Python
Responsive Web Design	Linux	Node.js
Wordpress, Shopify	Data Structures and Algorithms	Version control (Git)

PROJECTS

Personal 2D portfolio website

Crafted an immersive portfolio interface akin to a game using Tiled, Vite, and JavaScript, featuring dynamic map rendering, interactive elements, and custom fonts.
